"GEORGE BARIȚIU" COLLEGE OF ECONOMICS
SIBIU, ROMANIA

Summary ...

- Let`s do it, Romania!
 - By protecting the environment, we live healthy lives!
 - Sibiu recycles
 - By protecting nature we help ourselves!
 - Water World Day- Session of essays and specialised studies
 - We protect the forest!
 - National Competition on "Science and technologies"
 - Motivated to learn to love nature
- 

Let`s do it, Romania!

- The action involved cleaning Romania, particularly the waste drop out in nature. Our team collected 50 bags of waste from Zăvoi area.

By protecting the environment, we live healthy lives!

- Students got involved in the project *SIBIU PLANTS* by planting young trees on the surrounding hills.

Sibiu recycles!

- Within this activity the students from the 9th grade (F) collected plastic bottles and exchanged them for young plants. They used the young plants to create green areas in their neighbourhood.
- 

"By protecting nature we help ourselves!"

- Project of ecology and environment protection: together with volunteers of the association *Everything for the Community*, students carried out activities aimed to clean the "Sub Arini" Park.

Water World Day- Session of essays and specialised studies

- The activity is part of the Social Regional Project “Volunteering – an opportunity for personal development”- CAEJ Sibiu/2017-2018 registered for the section „How do we save and conserve our waters clean?”. The students coordinated by their teacher, Stănese Carmen, presented materials (essays and Power Point presentations) and had interesting debates on their topics; emphasis was placed on the importance of preserving and saving water.
- Another objective of this activity was to encourage students to adopt civic behaviour towards nature and to raise their environmental awareness.

We protect the forest!

National Competition on "Science and technologies", 11th edition

(Here are some of the students' presentations:

-*European sustainable development*

-*Responsible for the future through sustainable development in time and space*)

DEZVOLTAREA DURABILĂ LA NIVEL EUROPEAN:

UE propune legislație și politici de promovare a bunei guvernante și a dezvoltării umane și economice, cum ar fi cele pentru eliminarea foametei și conservarea resurselor naturale.

Instituțiile UE colaborează și furnizează finanțare pentru cele cinci aspecte ale dezvoltării durabile.

Protecting nature

The students from our college together with their families and friends got involved as volunteers in the planting activity along the road from Sura Mica where the highway will be built. Thus, according to the reports from the Forest Department and the Town Hall, students planted 3000 young trees. The students, together with the organizers, wanted to show the whole community that we have to respect and love nature and that we have to be united for a strong community.

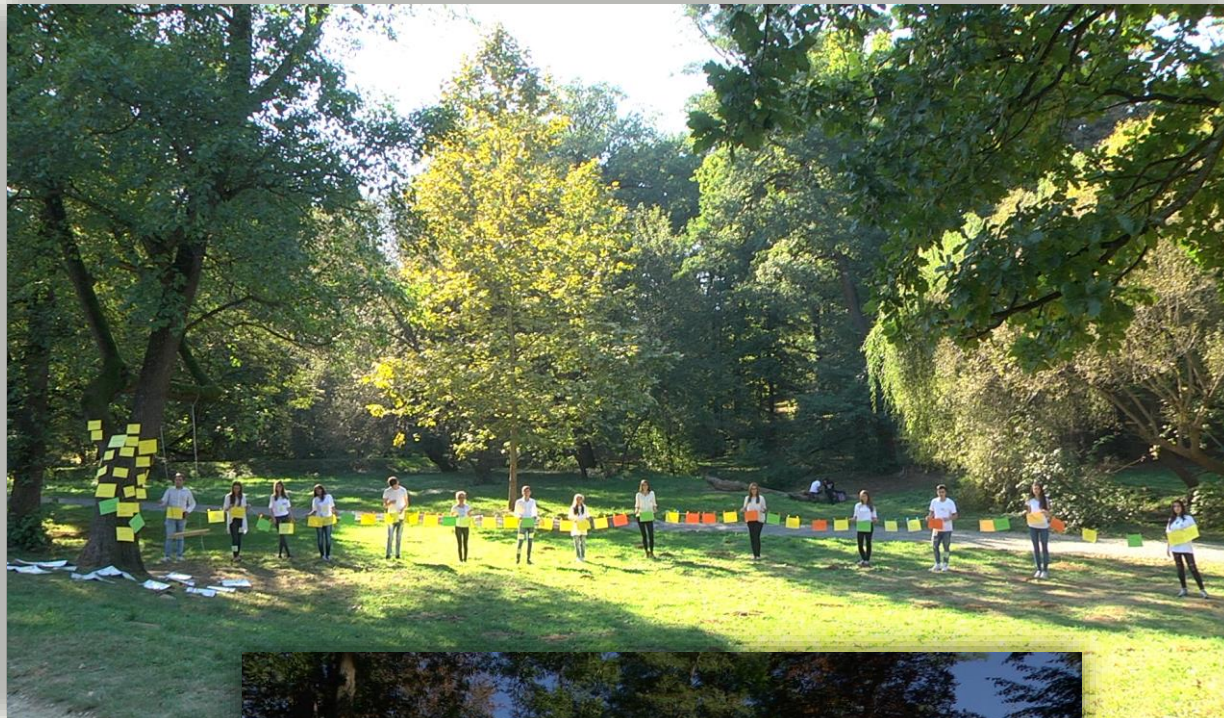

Motivated to learn to love nature

... is a project that was initiated in our college in 2018, a project that is continued annually and emphasises once again the cultural, educational, humanitarian and social projects in which our students were involved directly. Within this project, we want to introduce to our students other ways of socializing, of spending time together, of face-to-face communication without resorting to social networks, of spending time in nature, of organizing activities in their natural environment, ways of loving, protecting and discovering nature.

Motivated to learn to love nature
